

Test Name

Asset Upload with Naming and Status Verification

Business Goal

To verify that a user can successfully log in, upload an image asset with a specified name, and confirm the upload status displays as completed.

Application

Document Management System (DMS)

Preconditions

- The user has valid login credentials.
- The user has access to the application URL.
- The user has one or more image files ready for upload.

Test Steps

1 – User logs into the application

- 1.1 Navigate to the login page.
- 1.2 Click the login button.

Expected Result:

The user is successfully authenticated and redirected to the assets management page.

2 – User initiates asset upload

- 2.1 Click the upload button on the assets page.
- 2.2 Select the option to choose files for upload.

Expected Result:

The file selector interface appears allowing the user to choose files.

3 – User selects asset category and file

- 3.1 Navigate to select the default asset category.
- 3.2 Navigate to select the images subcategory.
- 3.3 Choose the intended image file to upload.

Expected Result:

The selected image file is prepared for upload under the correct category.

4 – User enters asset name

- 4.1 Enter the asset name progressively as "T", "Te", "Tes", "Test", "Test_", "Test_i", and complete as "Test_image".

Expected Result:

The asset name field reflects each input step and ultimately displays "Test_image".

5 – User uploads the asset file

- 5.1 Click the upload button to start the file upload.

Expected Result:

The upload process begins and dynamic status indicators display progress.

6 – User verifies upload status

- 6.1 Observe status messages cycling through "Waiting..." states.
- 6.2 Confirm the final status message shows "Completed".

Expected Result:

The upload status updates progressively and confirms completion of the upload.

7 – User interacts with the uploaded asset

7.1 Select the uploaded image asset labeled "IMG_142524".

7.2 Perform any additional interactions as required.

Expected Result:

The asset is accessible and available for further actions.

Postconditions

- The image asset named "Test_image" is uploaded and available within the assets management system.
- The user remains logged in and can continue further operations.

Traceability Mapping

Functional Step	Source Step IDs
1 – User logs into the application	39, 40, 41
2 – User initiates asset upload	43, 44
3 – User selects asset category and file	45, 46, 47
4 – User enters asset name	48, 49, 50, 51, 52, 61, 62, 63, 64, 65, 66
5 – User uploads the asset file	67
6 – User verifies upload status	68, 69, 70, 71, 72, 73
7 – User interacts with the uploaded asset	75, 77, 79, 80
