

Test Name

Upload and Complete Asset Submission

Business Goal

Enable users to successfully upload image assets with required details and complete the submission process in the DD application.

Application

DD

Preconditions

User has valid credentials and access to the DD application.

User is ready to upload image assets and provide necessary information.

Test Steps

1. Navigate to the login page of the DD application.
 - The login page loads successfully, displaying the login button.
2. Click the Login button to sign in.
 - The user is authenticated and redirected to the assets page.
3. On the assets page, initiate the upload process by clicking the upload option.
 - The upload interface opens, allowing file selection.
4. Select files to upload by clicking the select files option.
 - The file selection dialog appears, enabling file choice.
5. Choose the default option to proceed with the file type selection.
 - The interface updates to show available file categories.
6. Select the images category to filter file types.
 - The images category is selected, showing relevant files.
7. Confirm the selection by clicking the highlighted proceed button.
 - The system moves to the next step of the upload process.
8. Enter all required information in the provided input fields.
 - Each input field accepts the information and validates it as needed.
9. Click the upload button to start uploading the files.
 - The upload process begins, and progress indicators appear.
10. Monitor the upload progress by clicking through the waiting status indicators as they update.
 - The upload status changes from waiting to completed for each file.
11. Once uploads are completed, click on the completed status indicators to confirm.
 - Each file shows a completed status, indicating successful upload.
12. Select the uploaded image file (e.g., img_142524) to proceed.
 - The selected image is highlighted and ready for further action.
13. Click the highlighted proceed button to continue to the next step.
 - The system advances to the next stage of asset processing.
14. Click the highlighted proceed button again to confirm details or settings.
 - The system confirms the entered data and prepares for final submission.
15. Click the final highlighted proceed button to complete the asset submission.

- The asset upload and submission process is finalized successfully.

Postconditions

The image asset is uploaded with all required information and successfully submitted in the DD application.

Traceability Mapping

Functional Step Description	Source Step IDs
-----	-----

Navigate to login page	1
Click Login button to sign in	2
Initiate upload on assets page	3, 4
Select files to upload	5
Choose default file type	6
Select images category	7
Confirm selection to proceed	8
Enter required information in input fields	9 - 28
Start uploading files	29
Monitor upload progress through waiting status	30 - 32
Confirm completed upload status	33 - 35
Select uploaded image	36
Proceed through confirmation steps	37 - 39
