How to Log In and Upload Image Assets in DD (Mirrix)

1. Purpose

This guide shows you how to sign in to DD and upload image files to your Assets library, then open and review the uploaded item.

2. Scope

Use this guide if you are a DD user who needs to add new image assets (for example, product photos or marketing images) into the Assets area using the web app.

3. Prerequisites

- A DD account with permission to access ****Assets**** and upload files
 - Your DD login credentials (or an active session)
 - Image files saved on your computer (supported image formats as provided by your organization)
 - A supported web browser (Chrome, Edge, Firefox, or Safari)
 - Stable internet connection
-

4. Steps

Step 1 – Log in to DD

1. Open your browser and go to:

 `https://dev.mirrix.app/login`

2. Select ****Login**** to sign in.

- Example prompt you may see:

1. ****Email / Username****
 2. ****Password****
 3. ****Login****
-

Step 2 – Go to the Assets page

1. In your browser, go to:

 `https://dev.mirrix.app/assets`

(Or open ****Assets**** from the main navigation if available.)

Step 3 – Start an upload

1. On the Assets page, select ****Upload****.
2. Select ****Select files****.
3. Choose where you want to upload from (if prompted):
 1. Select ****Default**** (or your preferred source/location).
 2. Select ****Images**** to upload image files.
 - Screenshot label (example):

****[Upload dialog → Select files → Default → Images]****

Step 4 – Choose your files and enter required details

1. In the file picker, select the image file(s) you want to upload.
2. Select the highlighted ****Continue/Next**** button (the primary button in the upload window).
3. Fill in the required information fields shown on the form.
 - Tip: The form may include multiple required fields. Complete each field that is marked as required (often indicated by an asterisk `\*` or a “Required” message).
 - Example fields you might be asked for:
 1. ****Title / Name****
 2. ****Description****
 3. ****Tags / Category****
 4. ****Usage / Notes****
4. When you’ve completed the required fields, select ****Upload****.

Step 5 – Monitor upload progress until it completes

1. After starting the upload, watch the status indicator in the upload area.
2. If you see a status such as ****Waiting…****, allow the upload to continue processing.
3. When the status changes to ****Completed****, select ****Completed**** (if it’s clickable) to view the finished upload entry.
 - Screenshot label (example):
****[Upload status: Waiting... → Completed]****

Step 6 – Open the uploaded image and proceed through actions

1. In the Assets list, select your uploaded file (for example, ****IMG_142524****).
2. Select the highlighted primary button to proceed (you may see this button more than once depending on the workflow).
3. Continue selecting the highlighted button as needed to move through the remaining screens (for example, to confirm, save, or finish).
 - Example:
 1. Open asset: ****IMG_142524****
 2. Select ****Primary action**** (highlighted)
 3. Select ****Primary action**** again to finish the flow

5. Troubleshooting

| Issue | What you can do |

|---|---|

| You can’t log in | Re-check your email/password, then try again. If you forgot your password, use your organization’s password reset process or contact support. |

| Upload button is missing or disabled | Confirm you are on the ****Assets**** page and that

you have upload permissions. Try refreshing the page and signing in again. |
| Upload stays on “Waiting...” for a long time | Keep the tab open and wait a bit longer. If
it doesn't progress, refresh the Assets page and try the upload again. Also check your
internet connection. |
| You can't find your uploaded file in the list | Refresh the Assets page and look for the
file name (for example, “IMG_...”) or use any available search/filter options. |

6. Tips (Optional)

- Use clear, unique file names (for example, `ProductName\_Color\_Front.jpg`) to make assets easy to find later.
- Prepare required details (title, description, tags) before uploading to move faster through the form.
- Avoid closing the browser tab while the upload status shows **Waiting...**.

7. Contact Support

If you still can't upload or access Assets:

- Contact your DD/Mirrix administrator or internal help desk (recommended for permission issues).
- If your organization provides an official support portal, search for: **“Mirrix Assets upload”** or **“DD upload images”**.
- Include in your request:
 - The page you were on (**Assets**)
 - The file name you tried to upload (example: `IMG\_142524`)
 - The status you saw (**Waiting...** or **Completed**)
