How to Log In and Upload Documents in DD

1. Purpose

This guide shows you how to sign in to DD and upload documents to the Assets area using the Documents upload flow.

2. Scope

Use this guide if you need to upload one or more documents into DD (for example, adding files to an asset library or submitting a batch of documents). It's intended for any DD user with access to the upload feature.

3. Prerequisites

- A DD user account and password
 - Permission to access ****Assets**** and ****Upload**** (if your organization restricts uploads)
 - One or more files saved on your computer and ready to upload
 - A supported web browser (Chrome, Edge, or Firefox recommended)
 - Access to your organization's DD environment (for example, a dev or production URL)
-

4. Steps

Step 1 – Open DD

1. Open your web browser.
 2. Go to your DD login page (use the link provided by your organization).
 - Example: `https://dev.mirrix.app/assets` (your link may be different)
- > ****Note:**** If you were given a local link to open DD (for example, an internal page), open that link first, then continue to the login step below.
-

Step 2 – Log in

1. On the login screen, click through any on-screen prompts or “Continue/Next” buttons if they appear.
 2. Click the ****Password**** field and enter your password.
 3. Click ****Login**** to sign in.
-

Step 3 – Go to Assets

1. After signing in, open the ****Assets**** area.
 - If you are not already there, use the navigation menu or go directly to the Assets URL your organization provided.
-

Step 4 – Start an upload

1. Click ****Upload****.
2. In the upload window, click ****Drag your file(s) to start uploading****.

- You can either:
 1. Drag and drop your file(s) into the upload area, ****or****
 2. Click the area to browse and select file(s) from your computer

Step 5 – Choose upload location/type (Default → Documents)

1. In the upload options, select ****Default**** (if prompted).
2. Select ****Documents****.

Step 6 – Enter upload details (batch description, tags, and other fields)

1. Click the next/continue button (if shown) to open the document upload form.
 2. Fill in the required fields shown on the screen.
 - Examples of fields you may see:
 - ****Upload Batch Description****
 - ****Upload Batch Tags****
 - Other required information fields (as displayed)
- > ****Tip:**** If you're unsure what to enter for tags or descriptions, use your team's naming standards (for example, project name, department, date, or document type).

Step 7 – Upload the documents

1. Review your selections (files, ****Documents**** category, and details).
2. Click ****Upload****.
3. Wait for the confirmation message that the file upload is complete.
 - Example prompt you may see: ****File has been uploaded successfully****

Step 8 – Open the uploaded item

1. After the upload completes, click the uploaded item (or its ID/row in the list) to view it.
 - Example: you may see a numeric item reference you can click (such as ****142592****).

5. Troubleshooting

| Issue | What you can do |

|-----|-----|

| I can't log in (password not accepted). | Re-enter your password carefully (check Caps Lock). If you still can't log in, use your organization's password reset process or contact support. |

| The Upload button is missing or disabled. | You may not have upload permissions. Contact your DD administrator and request access to ****Assets > Upload****. |

| My file won't upload or gets stuck. | Refresh the page and try again. Check your internet connection, try a smaller file, or use a different browser (Chrome/Edge). |

| I don't see "Documents" as an option. | Confirm you're in the correct upload flow or workspace. If your role restricts document uploads, contact your administrator. |

6. Tips (Optional)

- Upload files in smaller batches if you have many documents to reduce failures.
- Use consistent **Batch Description** and **Tags** so your team can search and filter documents later.
- Keep file names clear and specific (for example, `ProjectA\_Contract\_2026-01-09.pdf`).
- Don't close the browser tab until you see the upload success message.

7. Contact Support

If you still can't complete the upload:

- Contact your internal DD administrator or IT help desk (recommended for access/permission issues).
- If your organization provides a DD support portal, search for: **"DD Assets upload"** or **"Upload Documents batch"**.
- Provide support with:
 - The page you were on (for example, **Assets > Upload > Documents**)
 - The time of the issue
 - The file name(s) you attempted to upload
 - Any on-screen error message text
