

Test Name

Upload Image File and Verify Completion Status

Business Goal

To verify that a user can successfully log in, navigate to the assets page, upload an image file, and confirm the upload reaches completion status in the application.

Application

DD Web Application

Preconditions

- User has valid login credentials.
- User has at least one image file ready for upload.
- User is accessing the application through a supported web browser.

Test Steps

1. ****Log in to the application****
 - Navigate to the login page.
 - Click the Login button.
 - Expected Result: The user is redirected to the assets page and is logged in successfully.
2. ****Navigate to the assets page****
 - Confirm that the assets page loads after login.
 - Expected Result: The assets page is displayed with relevant user asset options.
3. ****Open the upload interface****
 - Click the Upload button on the assets page.
 - Expected Result: The file upload interface is displayed allowing file selection.
4. ****Select files category for upload****
 - Click the Select files button to open file selection options.
 - Choose the "Default" category.
 - Choose the "Images" category.
 - Expected Result: The file selection dialog or file browser is prepared to receive image files.
5. ****Enter the file name for upload****
 - Type the file name "Test_image" in the input field.
 - Expected Result: The full file name is visible in the input field as it is typed.
6. ****Initiate file upload****
 - Click the Upload button to start uploading the selected image file.
 - Expected Result: The upload process begins, and a status indicator showing "Waiting..." appears.
7. ****Monitor upload progress****
 - Observe the status button showing progress updates such as multiple "Waiting..." states.
 - Expected Result: The status transitions appropriately through waiting states

indicating an active upload process.

8. ****Confirm upload completion****

- Click on the status button once it shows “Completed.”
- Expected Result: The upload is confirmed as complete and the application reflects the uploaded image in the assets list.

9. ****Access the uploaded image file****

- Click on the uploaded image labeled “IMG_142524”.
- Expected Result: The image file opens or is highlighted confirming availability for use or review in the system.

Postconditions

- The image file named “Test_image” is uploaded and accessible in the user's asset list.
- User remains logged in and can continue to upload or manage assets as needed.

Traceability Mapping

Functional Step	Source Step IDs	
-----	-----	
Log in to the application	39, 40, 41	
Navigate to the assets page	41	
Open the upload interface	43, 44	
Select files category for upload	45, 46	
Enter the file name for upload	47, 48-66	
Initiate file upload	67	
Monitor upload progress	68, 69, 70	
Confirm upload completion	71, 72, 73	
Access the uploaded image file	75	
Optional additional clicks (unlabeled buttons)	77, 79, 80
