

Business Level Functional Test Case Document

Test Name

User Login and Asset Upload in DD Application

Business Goal

Verify that a user can successfully log in to the DD application and upload digital assets through the assets interface.

Application

DD (Digital Asset Management)

Preconditions

- User has valid login credentials.
- User has appropriate permissions to upload assets.
- The web browser is open and connected to the internet.

Test Steps

Step 1: Access the DD Login Page

- Navigate the browser to the DD application login URL.
- **Expected Result:** The login page is displayed with fields for Email and Password, a login button, and options for alternative sign-in methods.

Step 2: Enter User Email

- Input the user's email address into the email field (e.g., hoanpx.bhsoft@gmail.com).
- **Expected Result:** The email address appears correctly in the email input field.

Step 3: Enter User Password

- Input the user's password into the password field. (Password entry is masked.)
- **Expected Result:** The password is masked and accepted without error.

Step 4: Submit Login Information

- Click the "Login" button to submit credentials.
- **Expected Result:** The application authenticates the user and redirects to the user's assets landing page.

Step 5: Verify Successful Login

- Confirm the browser navigates to the assets page URL.
- **Expected Result:** The assets dashboard is displayed, indicating successful login.

Step 6: Initiate Asset Upload Process

- Click the "Upload" button on the assets page.
- **Expected Result:** The upload interface opens, allowing selection of files for upload.

Step 7: Select Files for Upload

- Click the "Select files" button and choose files from the local device for uploading.
- **Expected Result:** The selected files appear in the upload queue, ready to be processed.

Step 8: Filter or Enter Asset Metadata (Optional)

- Enter relevant metadata or tags such as "Sample" and "TEST" in the designated metadata

fields to categorize the uploaded files.

- **Expected Result:** The entered metadata is populated correctly in the input fields associated with the files.

Step 9: Choose Asset Category

- Select the category "Images" under asset classification options.

- **Expected Result:** The selected category is highlighted and applied to the files being uploaded.

Step 10: Complete the Upload

- Click the "Upload" button to finalize the asset upload process.

- **Expected Result:** The application begins uploading the files and displays progress indicators.

Step 11: Verify Upload Completion

- Confirm that the newly uploaded asset (for example, named "IMG_142521") appears in the assets list.

- **Expected Result:** The asset is listed with correct details and is accessible for further actions.

Postconditions

- The user is logged into the DD application with an active session.
- The selected digital assets are uploaded and listed in the user's asset library.
- The user can proceed with managing assets or logging out as required.

Traceability Mapping

Functional Step	Source Step IDs
Step 1: Access the DD Login Page	1, 2
Step 2: Enter User Email	5
Step 3: Enter User Password	3, 6, 7, 8, 9, 10, 11, 12, 13
Step 4: Submit Login Information	4, 14
Step 5: Verify Successful Login	15
Step 6: Initiate Asset Upload Process	17
Step 7: Select Files for Upload	18, 19
Step 8: Filter or Enter Asset Metadata (Optional)	20, 21, 22, 23, 24, 25, 28, 29, 30, 31
Step 9: Choose Asset Category	26, 27
Step 10: Complete the Upload	32
Step 11: Verify Upload Completion	34, 35
