

Test Name

Verify Successful Login and Logout Process in OPIL UI

Business Goal

Ensure that a user can securely log into the OPIL UI, access the main application page, and successfully log out.

Application

Stockmann STEP / OPIL UI

Preconditions

- The user has valid login credentials.
- The user has network access to the Stockmann OPIL UI environment.

Test Steps

1. Navigate to the Stockmann main login page.
 - The login page is displayed and ready for user credentials input.
2. Enter the user password in the password field.
 - The password field accepts input and masks the entered data.
3. Click the login button to submit credentials.
 - The system authenticates the user and redirects to the OPIL UI main page.
4. Verify that the OPIL UI main application page loads successfully.
 - The application home interface is visible and interactive.
5. Click the logout button to terminate the session.
 - The system logs out the user and returns to the login page or a confirmation of logout.

Postconditions

- The user session is terminated and no longer has access to protected application pages without re-authentication.

Traceability Mapping

Functional Step	Source_Step Ids
1. Navigate to the Stockmann main login page	1
2. Enter the user password in the password field	3
3. Click the login button to submit credentials	4
4. Verify that the OPIL UI main application page loads successfully	5
5. Click the logout button to terminate the session	6
