

Test Name

Verify User Navigation and Basket Access on Amazon DE

Business Goal

Ensure the user can successfully navigate through the Amazon website and access the shopping basket without errors.

Application

Stockmann STEP / OPIL UI

Preconditions

- The user has access to a web browser with internet connectivity.
- The Amazon DE website is accessible.

Test Steps

1. Navigate to the Amazon DE homepage.
 - The Amazon DE homepage loads correctly and is displayed to the user.
2. Perform a series of button interactions on the site.
 - The system responds appropriately with each button click, updating the page or interface state as expected.
3. Navigate to the smart wagon cart page on Amazon DE.
 - The smart wagon cart page loads correctly and displays relevant items if present.
4. Click the "Go to basket" button.
 - The system redirects the user to the main shopping basket page.
5. Verify that the shopping basket page is displayed.
 - The shopping basket page loads successfully and shows the current contents of the basket.

Postconditions

- The user is on the shopping basket page and can review or modify the basket contents.
