

Test Name

User Authentication and Digital Asset Upload in Stockmann STEP / OPIL UI

Business Goal

To verify that a user can successfully log into the Stockmann STEP / OPIL UI, navigate to the asset management section, perform a digital asset upload, and access the asset details, ensuring smooth workflow and UI functionality as expected.

Application

Stockmann STEP / OPIL UI

Preconditions

- User has a valid registered email and password credential.
- User has access to the internet and the Stockmann STEP / OPIL UI environment is operational.
- Required digital asset files are available for upload.

Test Steps

1. Access the login page of the application.
 - The login page loads successfully and presents the login form fields.
2. Enter the registered email address into the email input field.
 - The email address is entered and displayed correctly in the email input field.
3. Enter the password into the password input field.
 - The password is entered securely and masked in the password input field.
4. Submit the login form by clicking the login button.
 - The system validates the credentials and grants access to the user dashboard or asset management main page.
5. Confirm navigation to the digital asset management section.
 - The assets page loads successfully and displays available digital assets and management options.
6. Initiate the asset upload process by selecting the upload option.
 - The upload interface is displayed, allowing the user to select files to upload.
7. Trigger the file selection dialog and choose the appropriate digital asset files.
 - The selected files are ready to be uploaded and visible in the upload interface.
8. Enter the asset name or search keywords progressively to filter or label the asset as "Sample" and then "Test".
 - The system updates the input field with each typed character, reflecting the partial to full search or asset naming terms.
9. Choose the asset category by selecting "Default" followed by "Images".
 - The selected categories are visually confirmed and applied to the asset upload context.
10. Finalize the upload by clicking the upload confirmation button.
 - The assets are uploaded successfully to the system and confirmation is displayed.
11. Access the uploaded asset details by selecting the specific asset named "IMG_142521".
 - The system navigates to the asset detail page, showing metadata and options related

to the chosen asset.

Postconditions

- User remains logged in, with uploaded digital assets accessible in the asset management system.
- Uploaded assets are categorized correctly and available for further management or processing.

Traceability Mapping

Functional Test Step	Source Step IDs
-----	-----
1. Access login page	3
2. Enter registered email	5
3. Enter password (masked)	6,7,8,9,10,11,12,13
4. Submit login form	14
5. Navigate to assets page	15
6. Initiate asset upload	17
7. Select files to upload	18,19
