

****Test Name:****

User Login and Asset Upload Functional Validation

****Business Goal:****

To verify the ability of the user to successfully log into the Stockmann STEP / OPIL UI application and perform asset upload operations, ensuring critical business workflows operate as intended.

****Application:****

Stockmann STEP / OPIL UI

****Preconditions:****

- User has valid credentials for the application.
- User has access to the internet and the required URL endpoints.
- Necessary permissions to upload assets are assigned to the user role.

Test Steps:

1. ****Navigate to the application login page****
 - Direct the user to the login interface of the Stockmann STEP / OPIL UI application.
 - ***Expected Result:** The login page is displayed with fields for email and password.
2. ****Enter valid user email****
 - Input the authorized email address into the email field.
 - ***Expected Result:** The email is accepted in the input field without errors.
3. ****Enter password securely****
 - Input the user's password into the password field (masked for security).
 - ***Expected Result:** Password field accepts input without displaying characters.
4. ****Submit login credentials****
 - Activate the login action by pressing the login submission button.
 - ***Expected Result:** User is authenticated and redirected to the assets landing page.
5. ****Confirm navigation to assets overview page****
 - Verify that the system redirects to the assets management page upon successful login.
 - ***Expected Result:** Assets page is displayed, showing available digital assets.
6. ****Initiate asset upload workflow****
 - Select the "Upload" action/button to begin the upload process.
 - ***Expected Result:** Upload dialog or interface opens, ready for file selection.
7. ****Open file selection dialog****
 - Use the interface to trigger file selection for uploading assets.
 - ***Expected Result:** System displays file selection dialog/window.
8. ****Input and verify asset search and filter terms (partial inputs)****
 - Sequentially enter partial asset names ("S", "Sa", "Sam", "Samp", "Sampl", "Sample") into the search or filter input field to verify live filtering functionality.
 - ***Expected Result:** Asset list dynamically refines to match entered input at each step.
9. ****Select asset category filter "Default"****

- Apply the "Default" category filter on the asset list.
 - *Expected Result:* Assets displayed are filtered to the "Default" category accordingly.
10. ****Apply "Images" category filter****
- Change the asset filter to the "Images" category.
 - *Expected Result:* Asset list refreshes to show only image assets.
11. ****Input and verify asset search terms ("T", "TE", "TES", "TEST") sequentially****
- Enter successive inputs into the search/filter field to further verify dynamic filtering.
 - *Expected Result:* Asset list updates correctly with each input reflecting search refinement.
12. ****Complete asset upload by confirming selection****
- Press the "Upload" button to finalize asset upload.
 - *Expected Result:* System processes upload and confirms successful asset addition.
13. ****Select a specific asset "IMG_142521"****
- Choose the asset labeled "IMG_142521" from the list for detailed view or management.
 - *Expected Result:* Asset details page or panel is displayed successfully.
14. ****Trigger opening the asset in STEP WebUI****
- Activate the option to open the asset within the STEP WebUI environment via the provided interface control.
 - *Expected Result:* The browser redirects or opens STEP WebUI with the selected asset context loaded.
15. ****Navigate to external or integrated web applications during workflow****
- Access linked resources or external URLs as part of the asset management or verification process.
 - *Expected Result:* The linked pages load correctly and are accessible via the interface.
16. ****Perform logout (implicit step if applicable)****
- End the user session securely by logging out of the application.
 - *Expected Result:* User is logged out and returned to the login page or confirmation screen.

****Postconditions:****

- User session is active upon successful login and asset upload.
- Assets are uploaded and visible in the repository under the appropriate category.
- User can access assets through the STEP WebUI.
- System remains stable and responsive throughout the process.

****Traceability Mapping:****

Functional Step	Source Step IDs
-----	-----

1. Navigate to login page	3	
2. Enter valid user email	5	
3. Enter password securely	4, 6, 7, 8, 9, 10, 11, 12, 13	
4. Submit login credentials	14	
5. Confirm navigation to assets overview page	15	
6. Initiate asset upload workflow	17	
7. Open file selection dialog	18, 19	
8. Input and verify asset search and filter terms	20, 21, 22, 23, 24, 25	
9. Select asset category filter "Default"	26	
10. Apply "Images" category filter	27	
11. Input and verify asset search terms	28, 29, 30, 31	
12. Complete asset upload by confirming selection	32	
13. Select a specific asset "IMG_142521"	34	
14. Trigger opening the asset in STEP WebUI	36	
15. Navigate to external or integrated applications	1, 2, 35, 37	
16. Perform logout (implicit or final step)	Not explicitly recorded
