

****Test Name:****

Upload and Manage Asset Images

****Business Goal:****

To verify that a business user can successfully log in, upload asset images with proper naming, monitor upload progress, and access the uploaded image details within the Stockmann STEP / OPIL UI application.

****Application:****

Stockmann STEP / OPIL UI

****Preconditions:****

- User has valid login credentials.
- User has access rights to upload and manage assets.
- Supported image files are available for upload.

Test Steps

1. ****Navigate to Login Page****

- User opens the application login page.
- ***Expected Result:** Login page loads successfully for user authentication.

(source_step: 39)

2. ****Perform User Login****

- User clicks the Login button and provides credentials (password masked).
- ***Expected Result:** User is authenticated and redirected to the assets overview page.

(source_step: 40, 41)

3. ****Access Upload Interface****

- User clicks the Upload button on the assets page to initiate asset upload.
- ***Expected Result:** Upload dialog window opens with options for file selection and categories.

(source_step: 43)

4. ****Select Upload Category****

- User selects the "Default" category and then selects "Images" as the asset type.
- ***Expected Result:** The system prepares the asset upload interface filtering only image files.

(source_step: 45, 46)

5. ****Choose Files for Upload****

- User clicks the Select Files button and chooses image files from their device.
- ***Expected Result:** Selected image files are listed and ready for naming and upload.

(source_step: 44, 47)

6. ****Enter Asset Name (Partial and Full)****

- User enters the asset name progressively: "Test_0801", later revising it to "Test_image".
- ***Expected Result:** Asset name field accepts input correctly and shows the final name before submission.

(source_step: 48 through 66)

7. ****Initiate Upload****

- User clicks the Upload button to start uploading the selected image files.

- *Expected Result:* Upload process starts, showing status messages that update from "Waiting..." to "Completed". (source_step: 67 through 73)

8. ****Access Uploaded Image Details****

- User clicks on the uploaded image labeled "IMG_142524" to view detailed information.
- *Expected Result:* The system displays the detailed information and options related to the selected image asset. (source_step: 75)

9. ****Complete Interaction****

- User performs additional interface interactions such as clicking buttons for further options or exiting upload dialogs.
- *Expected Result:* The application responds appropriately to user actions without errors and maintains session state. (source_step: 77, 79, 80)

****Postconditions:****

- New image assets are successfully uploaded and available in the asset management system.
- User remains logged in and can continue managing assets or log out as desired.

Traceability Mapping

Functional Step	Source Step(s)	
----- -----		
1. Navigate to Login Page	39	
2. Perform User Login	40, 41	
3. Access Upload Interface	43	
4. Select Upload Category	45, 46	
5. Choose Files for Upload	44, 47	
6. Enter Asset Name (Partial and Full)	48 - 66	
7. Initiate Upload	67 - 73	
8. Access Uploaded Image Details	75	
9. Complete Interaction	77, 79, 80
