

Test Name

Upload an Image Asset via the Asset Upload Feature

Business Goal

To ensure that a user can successfully log in, navigate to the asset management area, upload an image file with proper naming, and confirm the upload completion within the Stockmann STEP / OPIL UI application.

Application

Stockmann STEP / OPIL UI

Preconditions

- The user has valid login credentials for the application.
- The user has access rights to upload assets.
- The user is using a supported web browser.

Test Steps

1. Navigate to the application login page.

- Open the web browser and go to the login page of the application.
- Expected Result: The login page is displayed and prompts for user credentials.

(source_step: 39)

2. Perform user login by clicking the Login button.

- Click the Login button to submit credentials and proceed.
- Expected Result: The system authenticates the user and redirects to the assets

dashboard. (source_step: 40, 41)

3. Open the asset upload interface.

- On the assets dashboard, click the "Upload" button to initiate the upload process.
- Expected Result: The upload dialog or interface is displayed to select files for

uploading. (source_step: 43)

4. Select files for upload.

- Click the "Select files" button and choose the image files to upload.
- Expected Result: The selected files are loaded into the upload interface for

processing. (source_step: 44)

5. Choose the asset category filters.

- Click the "Default" filter option.
- Click the "Images" filter option to specify the file type.
- Expected Result: The asset category is set to Images for the upload operation.

(source_step: 45, 46)

6. Enter the asset name.

- In the asset name input field, type "Test_image" incrementally confirming input changes as you type.
- Expected Result: The input field correctly captures and displays the asset name as it is entered. (source_step: 48 through 66)

7. Submit the asset for upload.

- Click the "Upload" button to submit the assets.

- Expected Result: The upload process starts, and the button state changes to “Waiting...” to indicate progress. (source_step: 67 through 70)
8. Confirm the upload completion.
- Wait for the upload button to display “Completed” status and click it as necessary.
 - Expected Result: The upload completes successfully and the system confirms the completion status. (source_step: 71 through 73)
9. Access the uploaded asset details.
- Click on the uploaded asset name “IMG_142524” to open its details or further options.
 - Expected Result: The asset details page or dialog opens, showing relevant information and options. (source_step: 75)
10. Perform any additional clicks as part of the workflow.
- Click any further buttons prompted by the interface to complete the workflow.
 - Expected Result: The application processes inputs and navigates accordingly without errors. (source_step: 77, 79, 80)

Postconditions

- The image asset is uploaded and available in the asset management system.
- The user remains logged in and can perform additional operations.

Traceability Mapping

Functional Step	Source Step IDs	
-----	-----	
Navigate to login page	39	
Perform login	40, 41	
Open upload interface	43	
Select files for upload	44	
Choose asset category filters	45, 46	
Enter asset name input	48 to 66	
Submit upload	67 to 70	
Confirm upload completion	71 to 73	
Access uploaded asset details	75	
Additional workflow actions	77, 79, 80
