

Test Name

Upload and Verify an Image Asset in Stockmann STEP / OPIL UI

Business Goal

Ensure users can successfully log in, upload an image asset, and verify its availability within the system.

Application

Stockmann STEP / OPIL UI

Preconditions

- The user has valid login credentials.
- The user has access rights to upload assets.
- A web browser is available to access the application.

Test Steps

1. Navigate to the login page.

- Open the application login URL.
- Expected Result: The login page is displayed. (source_step 39)

2. Log in to the application.

- Click the Login button and submit valid credentials (password is entered securely).
- Expected Result: User is successfully logged in and redirected to the assets page.

(source_step 40, 41)

3. Open the asset upload interface.

- Click the Upload button on the assets page.
- Expected Result: The file upload interface appears. (source_step 43)

4. Select image files to upload.

- Click the Select files button.
- Choose the default folder, then select the Images category.
- Expected Result: Image files are available for selection. (source_step 44, 45, 46)

5. Search and select a specific image file.

- Use the search input field to type the image name progressively (e.g., start typing "Test_image").
- Expected Result: The search results update in real-time showing matching image files.

(source_step 47 to 66)

6. Initiate upload of the selected image.

- Click the Upload button to begin uploading the chosen image file.
- Expected Result: The upload process starts and status changes to "Waiting...".

(source_step 67 to 70)

7. Confirm upload completion.

- Wait for the status to change from "Waiting..." to "Completed".
- Expected Result: Upload status is shown as "Completed" confirming successful upload.

(source_step 71 to 73)

8. Verify the uploaded image asset is accessible.

- Click on the uploaded image file name (e.g., IMG_142524).

- Navigate through any further options or prompts to view the asset details.
- Expected Result: The image asset details and preview are displayed successfully.

(source_step 75, 77, 79, 80)

Postconditions

- The user remains logged in.
- The uploaded image asset is available and visible within the system’s asset repository.

Traceability Mapping

Functional Step Description	Source Step IDs
