

Test Name

Upload an Image Asset to the Mirrix Platform

Business Goal

Enable the user to successfully upload an image asset into the Mirrix asset management system to make it available for further use.

Application

Mirrix

Preconditions

- User has an active Mirrix account and valid login credentials.
- User is using a supported web browser.
- User is on a device with the required image file ready for upload.

Test Steps

1. Navigate to the Mirrix login page.
 - Expected Result: The Mirrix login page displays with fields for username and password.
2. Log into the Mirrix platform by entering valid credentials and clicking the Login button.
 - Expected Result: User is authenticated and redirected to the asset dashboard page.
3. From the asset dashboard, initiate the upload process by clicking the Upload button.
 - Expected Result: The upload interface opens, presenting options for selecting file types.
4. Choose to upload image files by selecting the appropriate category or filter on the upload interface.
 - Expected Result: The file selection dialog updates to show available image files.
5. Select the desired image file(s) for upload from the device.
 - Expected Result: The chosen file(s) appear in the upload queue ready to be named and confirmed.
6. Enter a unique and descriptive name for the image asset in the input field.
 - Expected Result: The entered name is displayed accurately within the input field.
7. Confirm the upload by clicking the Upload button on the interface.
 - Expected Result: The upload process starts, showing progress indicators such as "Waiting..." and changes to "Completed" upon success.
8. Verify that the uploaded image asset is listed in the asset dashboard with the correct name and status.
 - Expected Result: The image asset appears in the asset list with a status indicating successful upload (e.g., "Completed").

Postconditions

- The image asset is available and accessible within the Mirrix platform asset dashboard for future actions.
- User remains logged into the platform for further workflows.

Traceability Mapping

Business Test Step	Source Step ID(s)
