

Test Name

Upload and View Image Asset in Mirrix

Business Goal

To verify that a user can successfully log in, upload an image file with metadata, and view the uploaded asset details within the Mirrix platform.

Application

Mirrix

Preconditions

- The user must have valid login credentials for Mirrix.
- The user has access to a device with internet connectivity and a supported web browser.

Test Steps

1. Navigate to the Mirrix login page.
 - The login page is displayed, prompting for user credentials.
 - Expected Result: The login button is visible and ready for interaction.
2. Click the login button to access the platform.
 - The system authenticates the user and redirects to the assets dashboard.
 - Expected Result: The user is logged in and the assets page is displayed.
3. Click the "Upload" button on the assets dashboard.
 - The upload interface opens to allow file selection.
 - Expected Result: The file upload dialog or selection options appear.
4. Click the "Select files" button to open the file browser.
 - The file browser window opens allowing file selection.
 - Expected Result: The user can browse and choose files to upload.
5. Choose image files for upload using the file browser.
 - The user navigates and selects one or more image files.
 - Expected Result: Selected files are added to the upload queue.
6. Enter metadata for the upload.
 - The user types relevant information into the metadata input fields step-by-step until the intended asset name is complete.
 - Expected Result: Metadata fields reflect the entered asset name accurately (e.g., "Test_image").
7. Click the "Upload" button to start the upload process.
 - The system begins uploading the selected files and metadata.
 - Expected Result: The upload progress is indicated, initially showing status such as "Waiting...".
8. Wait for the upload to complete.
 - The system processes the upload until it shows a "Completed" status for all files.
 - Expected Result: Each uploaded file displays a "Completed" status confirmation.
9. Select the newly uploaded image asset from the list by clicking on its name.
 - The system opens the asset details view for the selected image.
 - Expected Result: Asset details page displays the selected image along with associated

information.

10. Interact with asset detail options (such as viewing additional details or actions).

- The user can access further asset-specific functions or information.
- Expected Result: The asset options and details are correctly displayed and accessible.

Postconditions

- The uploaded image asset is stored and available in the user's assets list.
- The asset metadata is saved and can be viewed or edited if necessary.

Traceability Mapping

Functional Step	Source Step IDs
----- -----	
1. Navigate to login page	39
2. Click login button	40, 41
3. Click "Upload" button	43
4. Click "Select files" button	44
5. Choose image files	45, 46, 47
6. Enter metadata for upload	48 to 66
7. Click "Upload" button	67
8. Wait for upload to complete	68 to 73
9. Select the uploaded image asset	75
10. Interact with asset details	77, 79, 80
