

Test Name

Upload and Manage Image Asset in Mirrix

Business Goal

Verify that a user can successfully log in, upload an image asset by selecting and naming the file, monitor the upload progress until completion, and access the uploaded image in the Mirrix application.

Application

Mirrix

Preconditions

- The user has valid login credentials for Mirrix.
- The user has access to an internet connection and a compatible web browser.

Test Steps

1. Navigate to the login page of Mirrix.
 - The login page displays correctly allowing user credential input.
(source_step: 39)
2. Click the Login button to authenticate.
 - The system processes login and redirects to the assets page.
(source_step: 40, 41)
3. Click the Upload button on the assets page to initiate an asset upload.
 - The upload interface opens, enabling file selection.
(source_step: 43)
4. Click the Select Files button to choose files for upload.
 - A file selection menu appears with default filter options.
(source_step: 44, 45)
5. Apply the 'Images' filter to narrow file selection to image files.
 - Only image files are displayed for selection.
(source_step: 46)
6. Begin entering the desired asset name in the input field, incrementally typing "Test_image".
 - The asset name input field updates accurately with each typed character.
(source_step: 48 to 66)
7. Click the Upload button to start uploading the selected image asset with the specified name.
 - The upload begins, and the system shows progress status.
(source_step: 67)
8. Observe the upload progress as the status changes sequentially from "Waiting..." to "Completed".
 - The system accurately reflects the upload state transition without errors.
(source_step: 68 to 73)
9. Click on the uploaded image file named "IMG_142524" to access or preview it.
 - The system opens or displays details of the selected uploaded image.

(source_step: 75)

10. Interact with any additional action buttons presented after image selection (e.g., confirm, close, or other options).

- The system responds appropriately to the interaction without errors.

(source_step: 77, 79, 80)

Postconditions

- The user remains logged in with access to uploaded image assets.
- The newly uploaded image asset "Test_image" is available and accessible in the assets list.

Traceability Mapping

Functional Step Description	Source Step IDs
