

Business Test Case Document

****Test Name****

User Login and Image Upload Workflow

****Business Goal****

To verify that a registered user can successfully log into the Mirrix web application and upload images, ensuring proper navigation, input handling, and confirmation of upload completion.

****Application****

Mirrix

****Preconditions****

- User has valid login credentials.
- User has images available for upload from the local device.
- The web browser is open and can access the Mirrix application URL.

Test Steps

1. ****Navigate to the Login Page****

- Navigate to the Mirrix login URL using a web browser.
- ****Expected Result:**** The login page loads fully and displays fields for username and password and a login button.

2. ****Perform User Login****

- Enter valid login credentials (username and masked password).
- Click the "Login" button.
- ****Expected Result:**** User is authenticated and redirected to the assets page displaying asset management options.

3. ****Access the Asset Upload Interface****

- Confirm navigation to the assets page.
- Click the "Upload" button to start the asset upload process.
- ****Expected Result:**** The upload interface opens, presenting options to select files and categories for upload.

4. ****Select Files for Upload****

- Click the "Select files" button.
- Choose one or more image files from the local device to upload.
- ****Expected Result:**** The selected files are recognized and listed in the upload interface for confirmation.

5. ****Choose Asset Category****

- Click the "Default" category option.
- Switch to the "Images" category by clicking the corresponding button.
- Confirm the selected category is set to "Images".
- ****Expected Result:**** The category is updated to "Images", ready for upload tagging.

6. ****Enter Asset Title****

- In the input field for naming or tagging the asset, enter the name "Test_image" incrementally, noting changes as you type:
 - Type "T", then "Te", "Tes", "Test", "Test_", "Test_i", "Test_im", "Test_ima", "Test_imag", and finally "Test_image".
 - **Expected Result:** The input field updates in real-time and reflects the full asset name "Test_image" before submission.
- 7. **Submit the Upload**
 - Click the "Upload" button to initiate the file upload.
 - **Expected Result:** The system shows upload progress status, initially displaying "Waiting...".
- 8. **Verify Upload Completion**
 - Monitor the upload progress status until it changes from "Waiting..." to "Completed".
 - Perform any required confirmations by clicking the "Completed" button as it appears.
 - **Expected Result:** The asset upload is completed successfully and the status confirms completion.
- 9. **Select the Uploaded Image for Review**
 - Click the button labeled with the uploaded image name (e.g., "IMG_142524").
 - **Expected Result:** The detailed view or preview of the uploaded image opens, confirming the image upload presence in the system.
- 10. **Exit Upload Workflow (Optional)**
 - Click any subsequent buttons necessary to close dialogs or return to the main assets page.
 - **Expected Result:** The interface returns to a stable state without errors or incomplete processes.

Postconditions

- User remains logged in and navigated back to the main asset management page.
- Uploaded image(s) are accessible and correctly listed in the assets.
- Upload process confirms successful completion with no pending actions.

Traceability Mapping

Functional Step	Source Step IDs
----- -----	-----
Navigate to the Login Page	39
Perform User Login	40, 41
Access the Asset Upload Interface	43, 44
Select Files for Upload	44 (file selection implied)
Choose Asset Category	45, 46, 47
Enter Asset Title	48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66
Submit the Upload	67

Verify Upload Completion	68, 69, 70, 71, 72, 73	
Select the Uploaded Image for Review	75	
Exit Upload Workflow (Optional)	77, 79, 80
